

Sanitherm underfloor heating

SANITHERM electric floor heating is the perfect complement to design radiators, ensuring that cold floors become a thing of the past. It is available as a heating mat consisting of a thin heating cable fixed on a fiberglass mat. This makes installation easy.

With a construction height of only about 5mm (excluding tiles), the heating mat is ideal for spaces where minimal floor elevation is possible. We recommend using electric underfloor heating as supplementary heating for added comfort in bathrooms.

THERMOSTAAT	DESCRIPTION
EL.BEDIENING.20	Digital built-in thermostat with floor sensor
EL.BEDIENING.21	Digital built-in thermostat with floor sensor and touchscreen
EL.BEDIENING.22	Digital built-in thermostat with floor sensor, touchscreen and WIFI function
EL.BEDIENING.23	Digital built-in thermostat, white, with floor sensor and WIFI function
EL.BEDIENING.24	Digital built-in thermostat, black, with floor sensor and WIFI function

Specifications Sanitherm

HEATING MATERIAL:

- The package includes:**
- A woven fiberglass mat with an attached electric heating cable
 - Sensor tube for sensor protection and effective temperature measurement
 - Installation and operating instructions

NOTE!
When placing an order, please specify the package number and thermostat choice!
